

Magnet Words

Glue these pages into your IN on left sides and add them to your TOC. Use your notes, Ancient Civilization Textbook, ANEW, or digital HA chapters on One Drive. DO NOT use the internet. I need you to be able to know them in context with what WE learned. This HW will help you get started reviewing for your unit test. In the center of each box is the magnet word. Find the definition by reading about the word in context. Then fill each corner with an example or descriptor that will provide the essence of the magnet word or draws meaning to that word. An example given in class is *geography*. The word would be in the center and in each corner would be written: 1. Climate and how it affects the people there, 2. Resources used by their culture, 3. Location in the world, 4. Physical features and their benefits and challenges.
