

Mesopotamian Empires Timeline

You will generate a timeline of the Mesopotamian Empires and peoples of the Fertile Crescent we discussed in class. Using the paper distributed in class, you will cover 5 on the front of the timeline and the remaining 2 on the back. Each section will have a box with the name of the empire, the date span, and the prominent king that ruled during its height. There will be another box that includes: the main achievement with supporting detail bullet notes and an illustration. The illustration can be hand drawn and colored if you are skilled or can be color printed from the internet and glued onto the timeline if you prefer. There should be a second box that includes other achievements, contributions, changes or innovations of that empire with an elaborating detail for each as well as one color illustration representing the box. The information can be handwritten if extremely neat and there is adequate room to include all the adequate information. You may opt to type it up in a text box and glue it onto your timeline if you feel you need more space or it will look more finished, neat and organized.
